E-COMMERCE

E-COMMERCE

It's essential when running an online business to be able to take payments via your website. On finding the product required, typically a 'click' will add the product to basket and give your shopper the option to check out and pay. This will then lead them to a page where they can enter their payment details securely.

As a merchant with an online presence, you should also be mindful that on occasion you may need to take offline payments. These 'Virtual Terminal' (VT) payments can be taken via telephone, mail order or fax channels, and can be scaled up to cope with the demands of a busy call centre environment.

Further options that provide you with flexibility as a merchant include the ability to send payment requests via a link as part of your invoicing procedure. Additionally, the ability to embed payment buttons to your social media posts can ensure that you are able to facilitate payments across these channels.

We at Modern World Business Solutions can help you with all of the above options. Our friendly staff are able to provide advice and guidance on the best solution to suit you or your client's needs.

PAYMENT GATEWAYS AND VT

Payment Gateways and E-Commerce are available through our partners below. For high-risk E-Commerce, each bank will have their own specific offering available.

Suggested Rates

Low Risk

Opayo By Elavon	£10 p/m	12p per transaction	Hospitality, Retail and Leisure
cardstream	£10 p/m	12p per transaction	Hospitality, Retail and Leisure

Low Risk | **Medium Risk**
